KIT SORTING GUIDE

How to Organize Your Scrapbook Kits by Category

01 | PAPER & CARDSTOCK

Core foundation of every kit — choose with intention.

- Sort by color family (warm tones, cool tones, neutrals)
- Separate by pattern type: solid, stripe, floral, geometric
- Group by weight and thickness for tool compatibility
- Organize by brand if you have brand-matched kits
- Separate by size: 12×12 vs. 6×6 vs. 8.5×11

02 | EMBELLISHMENTS

Decorative accents that add dimension, texture, and personality.

- Sort by type: stickers, die-cuts, chipboard, brads, buttons, flowers, gems
- Group by color to quickly pull coordinating pieces
- Separate large vs. small embellishments for scale balance
- Store by theme (travel, family, seasonal, everyday)

03 | STAMPS & INK

Tools for adding custom impressions, textures, and color bursts.

- Sort stamps by theme (sentiments, florals, borders, backgrounds)
- Group stamps by size for quick layout planning

- Sort ink pads by color family: darks, brights, neutrals
- Store ink pads face-down to prevent drying out

04 | ADHESIVES & TOOLS

Everything that holds your layout together — and makes it shine.

- Group by type: liquid glue, tape runner, foam dots, double-sided tape
- Keep tools together: heat gun, bone folder, scissors, trimmer
- Label expiration dates on adhesive products
- Store sharp tools safely — blade ends capped or sheathed

05 | PHOTOS & MEMORABILIA

The heart and soul of every scrapbook page.

- Sort by event, date, or person for quick retrieval
- Store in acid-free sleeves to prevent damage and yellowing
- Include journaling notes or captions with each batch of photos
- Label backs with pencil only — never permanent marker
- Include small memorabilia: tickets, tags, labels, pressed flowers

06 | ALPHAS & TITLES

Letter stickers, chipboard letters, and die-cut alpha sets.

- Sort by font style (script, block, mixed, hand-lettered)
- Group by color and size for coordinated titling
- Store full alpha sets in ziplock bags labeled by set name

- Note any missing letters on the outside of each pouch

07 | WASHI TAPE & RIBBON

Decorative tape and ribbon accents for borders, layers, and detail.

- Store washi rolls on a ring, dowel, or dedicated washi dispenser
- Sort by color family or pattern (solid, striped, floral, geometric)
- Label each roll with width measurement for layout planning
- Store ribbon lengths in small labeled envelopes by color

08 | DIGITAL & PRINTABLE ELEMENTS

Downloaded papers, overlays, clip art, and digital kits.

- Organize files in clearly labeled folders by theme or kit name
- Back up all digital files to cloud storage or an external drive
- Print on cardstock (not copy paper) for best color and durability
- Keep a printed index sheet of each digital kit for quick reference

✦ SORTING PRO TIPS ✦

- Work one kit at a time to avoid overwhelm — finish before starting another
- Use clear bins or labeled pouches for each category so contents are visible at a glance
- Photograph your kit before using — great reference for filming your process!
- Dedicate one box or tote per themed kit to keep everything contained and portable
- Refresh your kit checklist after each project to restock what you used

SECTION 3 OF 3

KIT ORGANIZATION CHECKLIST

Use this checklist before starting any new project

Before You Begin: ○○○○○

Papers & Backgrounds: ○○○○○

Embellishments: ○○○○○

Tools & Adhesives: ○○○○○○

Photos & Journaling: ○○○○○

During the Project: ○○○○○

Finishing & Storage: ○○○○○○
